FARWA RIZVI

UX & UI - DESIGNER

MULTIMEDIADESIGNER

Portfolio (UX/UI & Frontend)

ABOUT

I am a multimedia designer with a focus on UX/UI and user-centered design. I work structured with research, prototypes and usability tests in Figma and have experience in translating insights into concrete, functional solutions. With an understanding of front-end development and design knowledge, I find solutions that are both realistic and easy to implement. I am looking for a position where I can create value and further develop my skills.

EDUCATION

Multimedia Designer

Københavns Erhvervsakademi (EK)
Started in 2024 – Jan 2026 EK
Guldbergsgade 29N, 2200 kbh

HF-gymnasial uddannelse

Frederiksberg VUC&STX
Jan2021-Jan 2023
Falstersvej 3, 2000 Frederiksberg

Bachelors in Arts

University of Karachi
2010 - 2012

EXPERIENCE

JUNIOR UX & UI DESIGNER

Appologix Part-time remote work
from Nov 2024 - Feb 2025

SKILLS

Figma UX & UI

I have worked in Figma designing and prototyping user-friendly interfaces, including wireframes, UI components and design systems, as well as UX and visual hierarchy to improve digital solutions. Wireframes, prototypes, Crazy 8s, user stories, HMW and usability and functionality testing of websites.

User Research & User Insights

I conduct user research to understand user needs and behavior. This includes user interviews, identifying target groups, and generating insights that inform design decisions. I use methods such as 'How Might We' questions (HMW) to transform insights into concrete design challenges and solutions.

Information architecture & Card sorting

I use information architecture and card sorting to structure content intuitively. Through card sorting, I analyze how users categorize information to create a logical and user-friendly navigation that makes information easy to find.

Usability & Functionality Tests

I have experience with usability testing, including 5-second testing, BERT, functionality testing, "Think-aloud testing" and heuristic testing (expert testing). The methods are used to identify user problems and improve user flows and interactions in prototypes.

- Worked on B2C projects for various clients (restaurants, retail, etc.) Conducted user research and
- designed wireframes for high-fidelity prototypes in Figma. Conducted usability tests and iterated based on
- user feedback. Balanced business goals and user experience in
- collaboration with clients

UX & UI Designer

DemensAI Aps Fulltime Internship for 10 weeks from Aug 2025 - Nov 2025

- Designed B2B backoffice solution for various user types (tech-oriented employees, nurses, and administrative staff).
- Prepared user flows, sitemaps and navigation structures adapted to different competence levels.
- Developed and tested prototypes with focus on efficient workflows.
- Participated in frontend implementation of the design solutions.
- Designed and developed the complete Back Office system, improving internal workflows, usability, and overall operational efficiency.
- Led the redesign of the DEMENS AI platform by conducting UX research, identifying user needs and pain points, and creating user-centered wireframes and high-fidelity prototypes to enhance engagement and support business growth.

DESIGN SKILLS

Proficient in FIGMA

ADOBE EXPRESS

ADOBE ILLUSTRATOR AND OTHERS

CANVA

DESIGN REPORTS, ETC

From Low-Fidelity to High-Fidelity Prototypes

I work with both low-fidelity and high-fidelity prototypes to test user experiences. In the early stages, I use wireframes and sketches to test information architecture and user flow. Later, I create high-fidelity prototypes in Figma with detailed UI design and interactive elements that can be tested with users and developers before implementation.

Designproces med Double Diamond

I use the Double Diamond methodology to create user-friendly web solutions, focusing on understanding user needs, defining problems, developing prototypes, and delivering solutions that meet both user and business requirements. I have also learned to prepare design reports, pitch presentations, and documentation that support decision-making and communication of the design process.

MY STRENGTHS

Strong in Figma and prototyping

Team player with good communication skills

Analytical and solution-oriented

Good at finding solutions.

Overview of the entire design process (from research to development)

FRONTEND SKILLS

- **HTML , CSS & JAVA SCRIPT**
- **ASTRO - A SUSTAINABLE FRAMEWORK**
- **REACT**
- **NEXT JS**

MY INTERESTS

- **Traveling and exploring new cultures**
- **Playing badminton**
- **Music enthusiast**
