FARWA RIZVI

FRONTENDDEVELOPER

MULTIMEDIADESIGNER

Portfolio

ABOUT ME

I am a graduate and ambitious Multimedia Designer from EK with a strong focus on frontend development. Works with HTML, CSS and JavaScript, as well as modern frameworks such as React and Next.js. Has experience developing user-friendly and responsive web solutions with a strong focus on UX/UI, performance, and structured frontend architecture from real production projects. Possesses a solid understanding of the connection between frontend and backend and works with clear, logical code and project architecture. Highly motivated, curious, and always open to continuous learning and professional growth.

EDUCATION

Multimedia Designer

Københavns Erhvervsakademi (EK)
Startet i 2024 – Jan 2026
EK Guldbergsgade. Guldbergsgade 29N, 2200

HF-gymnasial uddannelse

Frederiksberg VUC & STX
Jan 2021 - Jan 2023
Falstersvej 3, 2000 Frederiksberg

Bachelors in Arts

University of Karachi
2010 - 2012

SKILLS

HTML, CSS & Javascript

Experience developing dynamic and responsive websites using HTML, CSS, and JavaScript, with a strong focus on user experience and functionality.

Astro & Sustainability

During my studies at EK, worked on redesigning and developing websites for case-based brand projects using Astro, with a focus on performance, sustainability, and lightweight frontend architecture. Developed climate-conscious and efficient web solutions using modern frontend technologies.

React & Next.js

Experience with React and Next.js for developing modern, component-based frontend solutions. Works with React hooks (useState, useEffect), global state management, and Next.js routing (file-based routing) to build structured and scalable applications. Strong focus on performance optimization, reusable components, and improved SEO through Next.js architecture and best practices.

TAILWIND & SHAD CN

Experience using Tailwind CSS to build responsive and consistent layouts, along with shadcn/ui for implementing and customizing reusable UI components. Works with design systems, component structure, and accessibility to ensure a cohesive and user-friendly interface.

JOB ERFARING

JUNIOR UX & UI DESIGNER

Appologix
Part-time, remote
from Nov 2024 - Feb 2025

Developed and implemented B2C WordPress websites with a focus on structured layouts, consistent UI, and responsive design. Translated Figma designs into production-ready pages and improved user experience through usability testing and continuous iteration.

Junior Frontend Developer

DemensAI Aps
Full time internship for 10 weeks
from Aug 2025 - Nov 2025

- Developed a backoffice dashboard for DemensAI.
- Worked closely with the backend team on database and REST API integration
- Used HTTP methods (GET, POST, PATCH, DELETE)
- Implemented data visualization and analytics (weekly/monthly averages)
- Built frontend logic using JavaScript
- Used Recharts and Framer Motion for data visualization and animations

Redesigned DEMENSAI Congitive assessments platform

- Redesigned a cognitive assessment platform with a strong focus on UX and usability.
- Migrated the platform from Streamlit to Next.js to improve performance and SEO.
- Implemented the solution using modern frontend technologies (Next.js, Tailwind CSS, JavaScript).
- Focused on responsive design and structured frontend architecture.

SupaBase & API Integration

Experience using Supabase as a backend solution for frontend projects, working with database management and API integration within React and Next.js applications.

REST API

Experience integrating REST APIs for data fetching and data handling in frontend applications. Works with HTTP methods (GET, POST, PUT, DELETE) and asynchronous data management in React and Next.js.

BACKEND & API FUNDAMENTALS

Database Architecture & API Understanding

Strong understanding of database architecture and data logic, including how data flows between backend and frontend. Solid knowledge of API documentation, endpoints, and proper data usage within frontend applications.

Experience with Postman, Thunder Client

Experience using Postman and Thunder Client for testing, validating, and debugging REST APIs and endpoints.

JWT Token authorization & CORS

Experience with JWT-based authorization gained during internship. Solid understanding of session management, including the use of cookies for storing and removing tokens, and how JWT is used for secure communication between frontend and backend.

ADDITIONAL TOOLS

- Redux Toolkit
- Axios
- Zustand
- Recharts
- Framer Motion

DESIGN SKILLS

Dygtige i FIGMA

ADOBE EXPRESS

ADOBE ILLUSTRATOR OG ANDRE

CANVA

DESIGNRAPPORTER OSV

MY STRENGTHS

Strong skills in Figma and prototyping.

Teamplayer with good communication.

An analytical and solution-oriented approach.

Good at finding solutions.

Strong overview of the full design process, from research to development.

Experience working with Backend developer

Collaborate with backend developers on API structure, endpoints, and data handling to ensure correct and stable integration between frontend and backend.

DEVOPS & WORKFLOW

CI/ CD PIPELINE

Experience with CI/CD pipelines using GitHub Actions to automate build, test, and deployment processes. Worked on preparing projects for production and deploying applications to AWS with a focus on stability and structure.

Git hub & Docker

Experience using GitHub for version control, including working with branches, commits, and pull requests in collaborative development projects.

Basic experience with Docker for setting up consistent development environments and containerizing frontend applications.

COLLABORATION-MEHTODS

JIRA , Daily Scrums & Canvas

Collaboration & Ways of Working
Strong communication skills with experience working in a structured manner using Jira to manage tasks and deadlines. Actively participate in daily scrums and work according to Agile/Scrum methodologies, including the use of Kanban boards (e.g., in Jira).

UX & UI PROCESS

Figma UX & UI

Worked with Figma to design and prototype user-friendly interfaces, including wireframes, UI components, and design systems, with a strong focus on UX and visual hierarchy to improve digital solutions. Experience with wireframes, prototypes, Crazy 8s, user stories, “How Might We” (HMW), and usability and functionality testing of websites.
